How to Use ConcenTrace Trace Mineral Drops ?

You can mix a few drops of CTMD to your juice, food or remineralize purified water. 20-40 drops per day for adults; 1 drop per 2 kg weight for children. You can apply it externally by just application of 1 or 2 drops on the affected areas. You may also dilute 40 drops of ConcenTrace in 50 ml. water and spray it over your face or body parts to give you a refreshing feeling. You can use CTMD in cooking to increase the flavor and nutrition of your food. Use of CTMD is not limited only to human beings as it is good for plants and animals too: One bottle of 60ML contains one thousand (1000) drops. 20-40 drops per day is recommended for person below average health. 3 to 4 drops per 250 ml. to re-mineralize distilled water.

You can use CTMD for your own drinking water, that of your pets, or plants. As our bodies naturally accumulate and use minerals, you can also supply your body with the minerals by adding CTMD to any food or beverage at any time.
A 60ml. fluid bottle can last up to approximately 1 month, depending on the dosage used, however you don't need to worry about the concentrate being affected over this time period. As a result of its pure concentration, the drops are naturally preserved and experience no bacterial growth. You may see minor crystallization; however this is only due to the super-saturation of the product, and will have no effect on its quality.

NOTE: Do not stop medication while taking CTMD those who are on prescription as CTMD is not a drug & not for medicinal use. Take the advice of your doctor for reduction in medication.

CTMD Helps to :

- Improve and strengthen bones, joints and teeth
- Improve growth of hair & skin
- Normalize Bowel Functions by cleansing
- Decalcification and cleansing functions
- Assimilate vitamins
- Promote a healthier cardiovascular system
- Improve blood serum nutrients
- Reduce the potentially harmful effects of carbonation
- Provide Energy
- Increase electrical conductivity in the body
- Increase energy, vitality, and improve health
- Maintain healthy blood sugar levels
- Improve immune system
- Weight reduction
- Improve memory power
- Fight depression
- Protect body against skin disorders/problems
- Restore sound sleep
- Reduce anxiety & neurotic disorders
- Grace the skin
- Improve eye sight
- Support insulin secretion

About ConcenTrace Trace Mineral Drops (CTMD)

CTMD is the most powerful natural health mineral supplement which contains natural mineral concentrate that restores the minerals in purified water, thus giving the body the supplements it needs to be healthy. It's impossible to underestimate the importance of minerals and trace minerals for the human body. They are the catalysts for all the vitamins and other nutrients your body uses for developing and maintaining good health. CTMD captures the perfect balance of those minerals.

Why our body needs CTMD?

Due to the increasing human population there has been an increase in the amount of pollutants found in the environment, and water must now be 'purified' through chemical means in order for it to be safe for us to drink. Still, all of the chemicals and pollutants are not removed and so often we use the process of distillation and reverse-osmosis to purify the water further. However, as well as removing contaminants, these processes also remove the minerals that are naturally found in water and which are essential for our health and well-being. In order for the body to stay balanced and perform at optimum efficiency, you need to constantly replenish yourself with the minerals and trace elements found in CTMD.

Where does CTMD come from?

CTMD contains natural mineral concentrate that is taken from the Great Salt Lake in Utah. 100% natural with no other ingredients added, these drops work by mineralizing the water before it enters the body, so for one minerals are not extracted from the cells, and for two those areas of the body lacking in minerals can obtain them from the water. This provides the body with the natural mineral supplements it needs to function properly that had been depleted from the water by purification.

The Great Salt Lake is the largest natural lake west of the Mississippi River which is approximately 75 miles long and about 35 miles wide & is a large remnant of Lake Bonneville which receded after the Ice age with changing climate. Much of the salt now contained in the Great Salt Lake was originally in the water of Lake Bonneville. Even though Lake Bonneville was fairly fresh, it contained salt that concentrated as its water evaporated. A small amount of dissolved salts, leached from the soil and rocks, is deposited in Great Salt Lake every year by rivers that flow into the lake. About 2 million tons of dissolved salts enter the lake each year by this means. The Great Salt Lake is a terminal lake & has no surface outlet hence all the minerals remain in the lake.

How Does CTMD Work?

When pollutants, contaminants, chemicals, additives, and toxins are removed from water by distillation or reverse-osmosis, the water becomes purified to an unnatural state, where even beneficial minerals are removed. When this purified, mineral deficient water enters the body, it balances itself with the bodily fluids by absorbing minerals from cells. This not only depletes minerals that are needed by the cells to function properly, but some of the mineralized water is excreted, the minerals leaving the body, thus depleting it further.

Four criteria for judging a trace mineral and 18 reasons why ConcenTrace wins every time

How should a trace mineral be evaluated?

1. **Quality:** Is this product balanced and pure? Is it natural and vegetarian? Does the product possess undesirable attributes? Is it Kosher certified?
2. **Absorption:** How easy is it for the body to assimilate this product?
3. **Concentration:** How much mineral is available in the supplement and how much must be taken to get adequate amounts?
4. **Value:** How economical is this product per daily dose?

Read on for details for 18 reasons why ConcenTrace wins every time:

Quality

1. **Effective:** People do feel the difference when taking CTMD
2. **Balanced:** CTMD has a natural mineral balance.
3. **Ionic:** The minerals are in their smallest molecular structure. The body relies on ionic minerals to conduct and generate billions of tiny electrical and other energy impulses every second.
4. **Pure:** CTMD is Kosher certified & is extremely low in heavy metals and contains no other contaminants.
5. **Natural:** CTMD is Vegan certified, 100% natural & vegetarian
6. **Standardized:** Strict quality controls are maintained to ensure that CTMD is a standardized product.
7. **Safe:** CTMD contains a natural balance of trace elements that are lacking in the diet & can be taken for extended periods of time.
8. **Rich in the right stuff:** CTMD is very low in sodium, yet rich in magnesium, boron, selenium, lithium, chloride and more than 70 total trace minerals.

Absorption

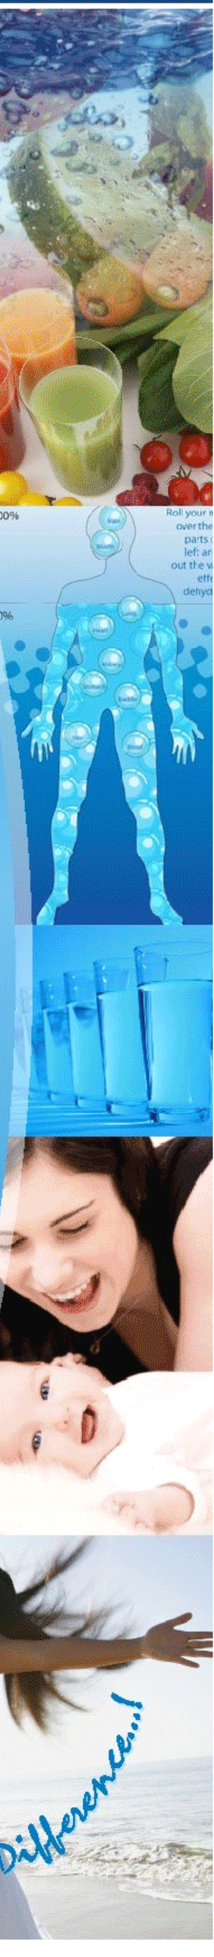
9. **Highly bio-available:** Minerals being Ionic are readily absorbed
10. **Body-fluid balanced:** Within the blood stream, lymphatic fluid, cells and extracellular fluid, minerals and trace minerals can be found completely dissociated into solution.
11. **Easily dissolved:** Minerals are maintained in true ionic solution which allows for maximum absorption.

Concentration

12. **High in mineral to water ratio:** With CTMD you are paying for a very high concentration of minerals; not water, fillers or anything else that you don't want.
13. **Convenient / Small daily dose:** CTMD bottle is convenient to use.

Value

14. **Adds Value:** CTMD has over 72 trace elements which will add value to any product.
15. **Long shelf life:** CTMD will not lose its potency
16. **Easy to ship:** CTMD is available in a convenient pack size.
17. **Value Based:** Not a single bottle of CTMD leaves their manufacturing facility unless they can confidently back it up with the guarantee of "Feel the Difference."
18. **Support:** You can expect quality, support and reliability.

Feel the Difference


There may be some normal reactions to CTMD depending upon persons: Slightly variation in amount of perspiration, in the color & clearness of your urine & smell of your stool or other bearable changes or sensation but it need not to be worried as these will indicate that CTMD is detoxifying your body. Using CTMD every day will help renew and energize your body's entire electrical system. You'll have more energy and will generally feel better!
